Education

Doctor of Philosophy

Bioinformatics

University College London

October 2011 - July 2016

Title: A Multi-omic Analysis of the Photosynthetic Endosymbioses of *Paramecium bursaria*

Supervisor: Thomas A. Richards

A reconstruction of cellular interactions in a nascent endosymbiotic system through novel application of machine learning and computational methods to analyse 'single' cell metagenomic, metabolomic, and metatranscriptomic datasets. It involved the first use of these datasets in the study of non-model multi-eukaryote systems.

Master of Arts

Natural Sciences - Biological Sciences, Honours

University of Oxford

October 2008–June 2011

Title: The Evolution of the Folate Biosynthesis Gene Fusions in the Eukaryotes.

Supervisor: Thomas A. Richards

Conducted an independent bioinformatics undergraduate honours research project to polarise deep-branching relationships within the evolutionary tree of life.

Research Grants

Awarded

MicroResearch Nova Scotia Project Grant

Co-PI (Provisional: \$3,000)

"Are We Helping the Helpers? A Review of Mental Health Programs, Processes and Supports Currently in Place for Halifax Regional Municipality First Responders"

Dalhousie University

January 2020

NVIDIA Accelerated Data Science GPU Grant

Co-PI (equivalent: \$4,000)

"Large-Scale Identification and Analysis of Promoter Sequences in 43,105 Bacterial Genomes"

Dalhousie University

September 2019

Social Sciences and Humanities Research Council Explore Grant

Co-PI (\$4,950)

"NEETs, Incels, and Wizards: The Experiences of Socially Isolated Men"

Dalhousie University

June 2019–May 2020

Donald Hill Family Fellowship in Computer Science

3-Year Independent Research Fellowship (\$165,000)

Dalhousie University

April 2019–Present

NASA Planetary Biology Program

10-Week Research Fellowship (£3,500)

John F. Kennedy Space Center

July–October 2013

UCL-NHM Joint-Institution PhD Studentship

4-Year PhD Studentship (£70,000)

University College London

October 2011–December 2016

Society for General Microbiology Harry Smith Studentship

8-Week Research Scholarship (£1,890)

University of Exeter

June–August 2010

Applied

Canadian Institutes of Health Research Project Grant

Co-Applicant (\$1,335,000)

"SARS-CoV-2 Genotype-Dependent Pathogenesis and Transmission"

Dalhousie University

Fall 2020

Canadian Institutes of Health Research COVID-19 Rapid Research Fund

Collaborator (\$765,355)

"Community-wide Screening for SARS-CoV-2 Through Wastewater Testing Using an Automated System"

Dalhousie University

May 2020

New Frontiers in Research Fund Transformation Grant

Collaborator (\$6,000,000)

"CAMRADS EMR Tech: Community AntiMicrobial Resistance Automated Stewardship using Electronic Medical Records Technology"

Dalhousie University

2020

Honours and Awards

Canadian Institutes of Health Research

Hacking AMR 2019 Award (\$3000)

Stockholm, Sweden

November 2019

American Society of Microbiology

Travel Award (\$600)

Washington, DC

September 2018

Canadian Society of Microbiology

Travel Award (\$500)

University of Manitoba

June 2018

Dalhousie Computer Science In-House Conference

Best Presentation (\$50)

Dalhousie University

January 2018

School of Informatics Jamboree

Poster Prize (£50)

University of Edinburgh

March 2015

National Data Science Bowl

Top ~5% (57/1049)

Neuroglycerin

December 2014–March 2015

American Epilepsy Society Seizure Prediction Challenge

Top 5% (16/527)

Neuroglycerin

August–October 2014

Federation of European Microbiological Societies Young Scientist Grant

Meeting Scholarship (£350)

Sant Feliu du Guixols, Spain

October 2013

Earth and Space Foundation

Research Scholarship (£300)

John F. Kennedy Space Center

July–October 2013

Federation of European Microbiological Societies Young Scientist Grant

Meeting Scholarship (£350)

Sant Feliu du Guixols, Spain

October 2011

Society for General Microbiology Undergraduate Grant

Travel Award (£170)

University of York

September 2011

Dukinfield Exhibition in Biological Sciences

Scholarship for Academic Excellence (£300)

University of Oxford

October 2009–July 2011

Research Experience

Donald Hill Family Fellow

Faculty of Computer Science

Dalhousie University

April 2019–Present

Independent research fellowship to develop interdisciplinary data analytics approaches with a social/health focus. Work includes the development of machine-learning based bioinformatics methods to improve antimicrobial resistance diagnostics/surveillance. This fellowship also supports collaborations with local non-profits and across academic disciplines to apply data-driven methods to help address problems related to current social/health issues (e.g., refugee health, homelessness, and substance-use disorders).

Postdoctoral Fellow

Faculty of Computer Science

Dalhousie University

February 2017–March 2019

Supervisor: Robert G. Beiko

Lead the development of the AMRtime project: a machine-learning based antimicrobial resistance prediction tool for metagenomic datasets. This work was part of the Public Health Agency of Canada's (PHAC) Integrated Rapid Infectious Disease Analysis Project. Responsibilities included co-ordination of industry consultations and several infectious disease genomic epidemiology projects involving 3 universities, PHAC, the Canadian Food Inspection Agency, and Agriculture and Agri-Food Canada.

Associate Research Fellow

Living Systems Institute

University of Exeter

October 2016–January 2017

Supervisor: Thomas A. Richards

Short-term fellowship to consolidate doctoral research. Work involved the *in silico* simulation and experimental induction of RNAi in *P. bursaria*, and modelling of protein transmembrane domain evolution using deep recurrent neural networks.

Competitive Machine Learning Team

Neuroglycerin

University of Edinburgh

August 2014–March 2016

- National Data Science Bowl II: estimation of cardiac ventricular volume from MRI videos with deep recurrent neural networks.
- National Data Science Bowl: image classification of plankton using a combined deep convolutional, computer vision augmentation, and hierarchical labelling approach.
- American Epilepsy Society Seizure Prediction Challenge: classification of pre-seizure iEEGs from normal brain activity utilising signal analysis features and an ensemble of classical models.

NASA Researcher*Exposing Microbes in the Stratosphere Project*

Supervisor: David J. Smith

Performed ground-based trials for project determining the transcriptomic response of *Bacillus* to stratospheric and extraterrestrial conditions. Assisted with the design and construction of an atmospheric microbial exposure and sampling module for use with high-altitude weather balloons.

John F. Kennedy Space Center*July–October 2013***BBC Scientific Consultant***Cloud Lab Documentary*

Acted as NASA representative and scientific advisor (uncredited) for a British Broadcasting Company documentary on atmospheric sciences. Developed experimental protocols, prepared materials, and briefed the cast and producers on relevant microbiological background information.

John F. Kennedy Space Center*October 2013***Undergraduate Researcher***SGM Harry Smith Studentship*

Funded summer honours research project (8 weeks) on the evolution of folate biosynthesis gene fusions within the eukaryotes using both molecular biology techniques and bioinformatics methods.

University of Exeter*June–August 2010*

Teaching Experience

Graduate Directed Study: Microbial Feature Encoding*Seminar Facilitator***Dalhousie University***May–August 2020***Bioinformatics Algorithms (CSCI6802)***Lecturer (12.5%)***Dalhousie University***January–April 2020***Graduate Directed Study: Machine-Learning Phenotype Prediction***Seminar Facilitator***Dalhousie University***September–December 2019***MicroResearch***Assistant Instructor***Dartmouth General Hospital***September 2019***Introduction to Computational Biology (CSCI4180/6801)***Lecturer (20%)***Dalhousie University***March 2019***Bioinformatics Algorithms (CSCI6802)***Guest Lecturer on Phylogenetic Statistics***Dalhousie University***March 2018***Data Management (INFO6540)***Guest Lecturer on Statistical Data Formats***Dalhousie University***February 2018***Adult Literacy Network***GED Tutor***North Memorial Library***January 2018–Present***International Course on Antibiotics and Resistance***Assistant Bioinformatics Tutor***Annecy, France***November 2017***Graduate Directed Study: Bioinformatics for Metagenomics***Seminar Facilitator***Dalhousie University***September–December 2017***Introduction to Python and Advanced Python***Assistant Instructor***University of Exeter***January–March 2016***Machine Learning for the Life Sciences***Lecturer (25%)***University of Exeter***June 2016***Bioinformatics for Genomics***Assistant Instructor***University of Exeter***February 2015***Unix and Perl***Assistant Instructor***University of Exeter***October 2014***Image Processing with Python***Assistant Instructor***University of Exeter***September 2014***Software Carpentry Bootcamp***Teaching Assistant***University of Exeter***November 2013*

Supervision Experience

Postdoctoral Fellows

Postdoctoral Fellow

Faculty of Computer Science

Co-supervision of a postdoctoral research project applying graph-based methods to improve surveillance of mobile antimicrobial resistance genes using metagenomic data. (Somayeh Kafaie)

Dalhousie University

May 2020–Present

Graduate Students

Antimicrobial Resistance Hackathon

Team Leader

Led a team of 5 graduate students developing a tool to facilitate automated epidemiological contextualisation of antimicrobial resistance detection.

Stockholm, Sweden

December 2019

Master's Student

Department of Sociology and Social Anthropology

Co-supervised a SSHRC-funded Sociology Master's student investigating the experiences of socially isolated men in the 'incel' community through a combination of interviews, qualitative analyses, and natural language processing (Kayla Preston).

Dalhousie University

June 2019–June 2020

PhD Student

Department of Molecular Biology and Biochemistry

Supervised a PhD student on a project investigating the limits of metagenome-assembled genome methods in public health monitoring of critical mobile genetic elements (Baofeng Jia).

Simon Fraser University

April 2019–October 2020

PhD Student

Department of Biochemistry & Biomedical Sciences

Co-supervision of a PhD student on a project using machine-learning and experimental validation to identify previously uncharacterised activities of known antimicrobial resistance genes (Kara Tsang).

McMaster University

June 2018–Present

Industrial Research Assistance Program Consultancy

Team Coordinator

Co-supervised a pair of PhD students on a NRC-IRAP funded consultancy project scoping possible predictive use-cases for time-sheet data (Miriã Rafante and Chaoyue Liu).

Dalhousie University

June–September 2018

Master's Student

Faculty of Computer Science

Co-supervision of a Master's student on a project looking at the evolution and spread of World Health Organisation priority antimicrobial resistance gene families (Jackie Purdue).

Dalhousie University

March 2018–Present

Bioinformatics Consultancy

Team Coordinator

Co-supervised 2 PhD students performing microbial genomic analyses for a clinical microbiome company (Miriã Rafante and Chaoyue Liu).

Dalhousie University

July–November 2017

Undergraduate Students

Undergraduate Research Project

School of Linguistics and Language Studies

Co-supervised an honours student characterising the use of "NetSpeak" by self-identified autistic redditors. (Emma Bornheimer)

Carleton University

October 2019–July 2020

Undergraduate Research Project

Department of Biochemistry & Biomedical Sciences

Co-supervised a student using machine-learning to model the impacts of different environmental toxins on *Zebrafish* (Corie Niu).

McMaster University

May 2019–September 2019

Undergraduate Research Project

Faculty of Computer Science

Co-supervised a summer student performing evolutionary analyses of putative resistance genes (Jocelyn McDonald).

Dalhousie University

May–August 2019

Undergraduate Honours Thesis

Department of Biology

Supervised a student analysing patterns of antimicrobial resistance in a recently released set of 8,000 diverse metagenome assembled genomes (Dayna Mikkelsen).

Dalhousie University

October 2018–April 2019

Undergraduate Research Project

Faculty of Computer Science

Supervised an NSERC-funded research assistant developing machine-learning approaches to detect rRNA gene fragments in metagenomes (Zhou Zhilei).

Dalhousie University

July–August 2018

High School Researcher

Department of Biosciences

Co-supervised a Nuffield Foundation-funded high school student from a deprived area performing research on the evolution of endosymbiotic algae (Katie Jones).

University of Exeter

January–March 2016

Undergraduate Honours Thesis

Department of Biosciences

Supervised an honours project using phylogenetic analyses to understand the evolution of the RNAi system of *Paramecium* (Chloe Ormrod).

University of Exeter

November–December 2014

Undergraduate Honours Thesis

Microbiology

Supervised a visiting research student registered at the University of Oxford for a project identifying horizontal gene transfers of arsenate resistance (Harry Spencer).

Natural History Museum

June–October 2013

Professional Experience

Canadian COVID Genomics Network (CanCOGeN)

Workflow Development and Quality Control

Member and lead developer of the main assembly workflow used by the Public Health Agency of Canada and within Toronto's University Health Network.

National

April 2020–Present

Conference Peer Review

Workshop Reviewer

Performed reviews of submissions for RECOMB-Seq 2020

Conference

January 2020–Present

New Frontiers in Research Fund Explore

External Grant Reviewer

Acted as an external grant reviewer for the 2019 Explore competition stream for high-risk, high-reward, interdisciplinary research.

Canadian Tri-agency Secretariat

December 2019–Present

Public Health Alliance for Genomic Epidemiology (PHA4GE)

Data Structure Working Group

Member of technical working group one (Data Structures). Project lead for work improving interoperability of antimicrobial resistance gene detection tools in public health lab within the Pan American Health Organisation.

International

November 2019–Present

Canadian Association of Postdoctoral Societies Annual Conference

Organiser

Hosted and coordinated the annual general CAPS meeting. Included talks on postdoctoral fellow welfare, equity diversity and inclusion initiatives, and analyses of national survey results.

Dalhousie University

3 November 2019

Integrated Rapid Infectious Disease Analysis (IRIDA) Initiative

Tool Development Team

Member and project lead for a tool designed to improve public health infectious disease surveillance and diagnostics using metagenomic data.

National

February 2017–Present

Publication Peer Review

Journal Reviewer

Reviewed articles for: Journal of Open Source Software, Microbiome, Current Biology, BMC Genomics, PLoS Computational Biology, Nature Microbiology, GigaScience, Communications Biology, ASM MSysystems, and Bioinformatics

Journals

February 2014–Present
